SUMMARY

I help engineering teams ship faster and cleaner by leading frontend architecture and delivery hands-on. 7+ years driving React/TypeScript frontends across fintech and SaaS, with full-stack reach into C#/.NET. I modernize legacy codebases, build scalable systems, and grow engineers through mentoring and hiring.

WORK EXPERIENCE

Senior Software Engineer / Tech Lead Jan 2025 – Present

Netchex — Remote

- Drive technical architecture decisions and sprint planning for a 10-person team while shipping features across React, .NET, and BFF layers.
- Run 2+ technical interviews per week and own onboarding for new hires.
- Got a prize at an internal hackathon by shipping a client-requested feature in two weeks.

Engineering Manager Dec 2023 – Dec 2024

Stenn International — Barcelona, Spain

- Built and led a new 5-person engineering team responsible for two business-critical services (financing and data integration).
- Introduced an Agile delivery process and a predictable sprint cadence with consistently high goal completion.
- Increased release frequency to three deployments per sprint.
- Implemented metrics-driven monitoring and alerting in production.

Senior Frontend Developer Jan 2021 – Dec 2023

Stenn International — Remote

- Introduced GraphQL for new API requests, improving data-fetch interaction speed by ~20%.
- Reduced frontend codebase size by 25% through systematic refactoring.
- Added component testing with Jest and React Testing Library, raising coverage and reliability.
- Automated API client generation from Swagger/OpenAPI and integrated it into CI/CD.
- Mentored a QA engineer transitioning into a frontend role.

Frontend Developer Jan 2020 – Dec 2020

Aori — Moscow, Russia

- Built a campaign-budget dashboard with real-time updates over WebSockets.
- Migrated functionality off AngularJS 1.4, removing ~40% of legacy code.
- Delivered an auto-campaign-creation feature end to end.
